

Medical Tourism for Healthcare

Obesity Treatment & Surgery

Required Data Form

Patient Name:

Process; in terms of Operation

Pre-Arrival: The guest/patient is asked some data in order to have first assessment and evaluation on paper from a distance, so that his/her Doctor can foresee the best possible treatment & surgery among the options which will fit to guest/patient's physical values & expectations. Then, suitable Obesity Treatment & Surgery option is declared along with a price. If the guest/patient confirms the conditions, he/she is given an appointment by your local agent (Cangezi) based on the flight ticket purchased by the guest/patient. He/she flies to the destination...

PS: Apart from regular methods of communication (e-mail, phone call, text message, etc) Whatsapp call, Skype call and/or Video conference can be arranged at this stage...
